Preface

This volume contains the papers presented at a student research forum during the SOFSEM 2002 conference. The SOFSEM 2002 Student Research Forum was held on November 27th, 2002, in Milovy, Czech Republic.

SOFSEM (SOFTware SEMinar) is an annual five day international conference devoted to the theory and practice of software systems. Its aim is to foster cooperation among professionals from academia and industry working in various areas of computer science. The SOFSEM program consists of a series of Invited Talks, given by prominent professionals and researchers, and Contributed Talks selected by the Program Committee from submitted papers. This year was the SOFSEM conference accompanied by the Student Research Forum. The main purpose of the SOFSEM Student Research Forum is to publish and discuss students' projects in the field of theory and practice of informatics.

The SOFSEM 2002 Student Research Forum attracted 18 submissions from 6 countries. The submissions were subject to a review process with each paper having been reviewed by 3 referees. After many on-line discussions, 9 papers were accepted for inclusion in this volume, which stands for the SOFSEM 2002 Student Research Forum proceedings.

I would like to thank all PC members for their work during the reviewing process, all authors for their effort in writing contributions, the Organizing Committee, and in particular, Aleš Křenek and its chairman Jan Staudek, for their very effective support in technical preparations of this proceedings and in making this event to happen, and Gabriela Polčicová from the Faculty of Electrical Engineering and Information Technology, Slovak University of Technology in Bratislava for her excellent job during preparation of these proceedings.

I believe that this event will become regular part of future SOFSEM conferences and the number of attracted young researchers will grow.

October 2002

Organization

The SOFSEM 2002 Student Research Forum, held on November 27th, 2002 in Milovy, Czech Republic, was organized as an accompanying event of the SOFSEM 2002.

SOFSEM (SOFTware SEMinar) is an annual five day international conference devoted to the theory and practice of software systems. Its aim is to foster cooperation among professionals from academia and industry working in various areas of computer science.

Program Committee Chair

Mária Bielíková (Slovak University of Technology in Bratislava, Slovakia)

Program Committee

Luboš Brim (Masaryk University Brno, Czech Republic)

Janos Csirik (József Attila University, Szeged, Hungary)

Leszek Pacholski (University of Wroclaw, Poland)

Jaroslav Pokorný (Charles University, Prague, Czech Republic)

Branislav Rován (Comenius University, Bratislava, Slovakia)

Jiří Šafařík (University of West Bohemia in Pilsen, Czech Republic)

Gerard Tel (University of Utrecht, The Netherlands)

Peter Vojtáš (P.J. Šafařík University Košice, Slovakia)

Tatjana Welzer (University of Maribor, Slovenia)

Organizing Committee Chair

Jan Staudek (Masaryk University Brno, Czech Republic)

Table of Contents

How to Distribute LTL Model-Checking Using Decomposition of Negative Claim Automaton	9
<i>Jiří Barnat</i>	
Learning Restarting Automata by Genetic Algorithms	15
<i>Petr Hoffmann</i>	
Information Quantities and Possibility Measures	21
<i>Tomáš Kroupa</i>	
Oraculum, a System for Complex Linguistic Queries	27
<i>Vladimír Ljubopytnov, Petr Němec, Michaela Pilátová, Jakub Reschke, and Jan Stuchl</i>	
PreDiaG: A Tool for the Generation of Predicate Diagrams	35
<i>Cecilia E. Nugraheni</i>	
\oplus -OBDD in Symbolic Model Checking	41
<i>Vojtěch Řehák</i>	
SGCCS: A Graphical Language for Real-Time Systems	47
<i>David Šafránek</i>	
Limited Assignment Number Search Algorithm	53
<i>Kamil Veřmiřovský and Hana Rudová</i>	
An Intelligent Firewall to Detect Novel Attacks	59
<i>InSeon Yoo and Ulrich Ultes-Nitsche</i>	
Author Index	65
