

Name	Assignment
Andrášik	Spherical rotary LED display
Baranovičová	Ultrasonic range system
Brisuda	Embedded systems for automobiles
Bujna	System for switching heating cable
Cihák	Guardino Embedded system for monitoring of growing conditions
Csaplár	Game controller
Dlhý	Meteo station
Dulovič	Weather station
Dyomina	Embedded system for temperature and humidity measurement
Gajdoš	Hive monitoring system based on .Net Gadgeteer
Grman	Wireless control for robotic arm
Hudec, Bañas, Kolek	Smart control of electrical appliances
Kalčok	Remote controlled sunshine covering
Kelemen	Advanced irrigation system
Kobza	Embedded system for automatization of morning routines
Kolek	Smart control system for electronics
Košťál	PiMiner
Krajčovič	Meteo station
Krkoš, Macho	Photo-trap
Ľalík	Parking sensor with visualization with the mobile application
Lenčucha	Mobile robot electronics - Segway
Lipovský, Švarc	Logging arrivals and TV remote control based on motion detection
Masár	Authentication system using RFID
Michálek	Mobile sensor controlled robot in IoT with safety brakes Yobot
Mikuška	Cloud server
Mtier	Intelligent lighting
Poljak, Putala	Control station for smart home
Radošínský	Wireless control for robotic arm
Repka	Embedded system for automatization of morning routines
Rychvalský	Morse code on the Arduino platform
Slaninka	Home automation system
Sýkora	Hive monitoring system based on .Net Gadgeteer
Šoltés	Electromechanically door control system with RFID reader
Štefánik	Thermometer with HTTP server and thermostat function
Vlček	Home security system
